

# Solutions for Cosmetics and Related Industries

## Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions, which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers, delivering classic CRM components including sales force automation, customer care, marketing including emarketing and Web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

## Implementing a business management solution for process manufacturing, especially cosmetics, flavouring and fragrances need not leave a bad taste

A very competitive market, time from design to market and constant regulation changes all make the process manufacturing and distribution of cosmetics, food ingredients, flavorings and fragrances a management challenge.

Understanding that cosmetics, flavourings and fragrance manufacturers or distributors have different needs from other organizations, our software offers a choice of solutions ranging from powerful ERP functionality, process manufacturing, warehousing, supply chain management, and quality management.

The key features that drive the success of an ERP implementation in this environment include:

### • Financial

- o Fully integrated financial modules allow the seamless transfer of data between the operational and financial modules.
- o Full BI capability, giving users easy to understand reports that are delivered on time.
- o Multiple currency and legislation management.
- o Multiple costing methods assigned at stock code, stock category or warehouse levels, with comparative costing.
- o Accounting for wastage and scrap costing.
- o Profitability reporting by product, group, customer or order.
- o Drill down or roll up analysis of costs, expenses or revenues.

### • Process Manufacturing

- o Advanced pick, pack and put-away rules facilitating multiple bins and location management.
- o Zoning for hazardous chemicals storage, blending, and decanting.
- o Forward and backward trace-ability with lot tracking.
- o Management of conversions from bulk to various pack sizes and container management.
- o Handling of shelf-life days, expiry dates or controlled temperature environments.
- o Powerful quality control and inspection management including the storage or sample details and trace-ability.
- o Multiple suppliers of same component with one stock code linked to supplier code and description.
- o Expected yield management, tolerances and variance controls.

### • Operational

- o Easy to use web interface that utilizes graphically illustrated business process flows, reducing the processing time and burden on employees.
- o Convenient graphical dashboards allowing users a snapshot of the data in their specific area of responsibility.
- o Full trace-ability of all communications from design to market.
- o Multiple language interfaces, making the system easier to use for both users and support staff, with option to use industry terminology.
- o HACCP, FDA and ISO compliance support.
