

Solutions for FDA Registered Companies

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions, which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers, delivering classic CRM components including sales force automation, customer care, marketing including emarketing and Web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Seeking flexibility whilst meeting demanding regulatory requirements

FDA-registered manufacturers in industries such as pharmaceuticals, nutraceuticals and medical devices are increasingly under pressure to maintain their competitiveness while simultaneously complying with an increasing array of regulatory requirements. Comply to FDA Regulations like CFR 21 Part 11. Manufacturers of Life Science products need flexible industry-specific functionality. Support with Process and Discrete Processes as required.

Accpac addresses the needs of mid-sized discrete manufacturers in Industrial and Consumer Goods, Medical Devices, Paper and other Hard Goods Industries. The key features that drive the success of an ERP implementation in this environment include:

The key features that drive the success of an ERP implementation in this environment include:

- Pharmaceutical and nutraceutical manufacturers need automated support for process or batch manufacturing environments involving formulation management, weight calculations and potency.
- Medical device manufacturers typically deal with discrete units in configure-to-order, make-to-order, assemble-to-order or make-to-stock environments.
- All life science manufacturers require support for full lot control & traceability, quality assurance & control.
- Integrated quality control process that can rigorously enforce inspections to assure item conformance
- Inspections can be conducted at key event points.

For more information please feel free to contact us on strategicsales@accpac.co.za, for a free needs assessment or product presentation tailored to your needs.

- Suspicious items or those that fail any inspection rules are automatically quarantined. All Rules Based.
- FDA manufacturers and Distributors often require additional support for their distribution operations, particularly in the areas of warehousing and logistics: WMS and RF
- Accpac solutions have graphical interfaces to assist in the management of functionality such as MPS and MRP
- Additional functionality to help handle complex challenges related to both infinite and finite capacity management.
- Import Tracking allows tracking of imported goods from the time of shipping through to loading on the container and subsequently the vessel used until receipted in your warehouse. This allows for complete transparency in the supply chain and permits multiple landed costs to be accurately handled.
- Complete industry-specific functionality including the first class management of manufacturing and quality as well as integrated supply chain, CRM... and much more!
