

Solutions for Financial Resource Planning

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions, which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers, delivering classic CRM components including sales force automation, customer care, marketing including emarketing and Web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Robust solutions for a fast changing world

In today's challenging conditions, companies require complete and expert coverage of the financial functions landscape to provide a 360 degree view of the company's performance, financial accounting, budgeting and consolidations.

Sage FRP solutions sit at the heart of the business. This allows users to make decisions and dictate policy directions on reliable and up to date information via integrated business intelligence and reporting tools. This increases productivity and aids businesses in aligning strategic and operational goals in a realistic manner.

The key features that drive the success of an ERP implementation in this environment include:

- **Daily accounting tasks and functionality**

- o Promotes ownership by users and easing the change management process via interactive graphs and intuitive user portals.
- o User specific data access which reduces the risk of sensitive data leaking out and increases the system security and transparency.
- o Graphical dashboarding and displays allowing users to track key responsibility areas at a glance.
- o Powerful Multi-Currency and Inter Company Consolidation capabilities further easing the administrative burden on users.
- o Complete and secure Purchase Order processing, passing requests through the various levels and ensuring the correct people sign off on the required documents.
- o Sophisticated dimensions and analytical ledgers giving the ultimate financial analysis platform.
- o Manage receivables across the business by analysing payment histories to assist with payment optimisation developing critical insights into delays that put pressure on cash management.

For more information please feel free to contact us on strategicsales@accpac.co.za, for a free needs assessment or product presentation tailored to your needs.

- o Full transaction traceability allowing users to drill through to originating documents as well as back through to the General Ledger entries, further giving users a full view of the chain of events and financial and budgetary implications.

- **Fixed Asset Management**

- o Full compliance to IAS / IFRS standards ensuring transparency and adherence to the prescribed standards.
- o Powerful management of assets from depreciation and transfer through to mergers of divisions and business restructuring.
- o Comprehensive reporting on asset situations and values as well as the ability to simulate runs and view the movements prior to posting to the General Ledger.
- o Multiple legislative compliances allowing multi-national companies the ability to easily manage worldwide assets in the relevant local legal and taxation frameworks.

- **Budgeting**

- o Integrated Excel export and import budgeting capabilities, allowing users to centralize or de-centralize the budgeting process.
- o Add-on budgeting tools available for use in a distributed environment with a high number of non-financial type users to easily capture and record accurate budgets.

- **Reporting**

- o Easy to use graphical reports on the user dashboards, allowing users to drill straight into business critical and relevant reports.
- o Fully Excel based reporting tool allowing users to analyze data in cube formats, giving a true 360 degree view of information.
- o Powerful web portal where users can access specific reports on demand, reducing down times and increasing transparency across the business.
