

Solutions for Government

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers delivering classic CRM components including sales force automation, customer care, marketing including emarketing and web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Compliance, Governance and Sustainable Development

Greater transparency in the government sector also means increased pressure on systems and controls. In order to enhance corporate governance and seek sustainable development it is necessary to ensure compliance with a fully integrated end to end FRP (Financial Resource Planning) system to include financial and cost accounting, asset management, budgeting and procurement.

The key features that drive the success of an ERP implementation in this environment include:

- Compliance and Governance Tracking to assist with meeting requirements for PFMA, GAAP, GRAAP and IFRS as well as managing Prescripts from National Treasury and DTI.
 - Full automation of financial processes with electronic signatures driven by workflow rules increase productivity and deliver end to end traceability of financial flows.
 - Integrated CRM layer to deliver efficient Call Centre activities for complaint handling, incidents and marketing as well as using sophisticated self service portals for online help.
 - Vendor Relationship Management is a natural extension of our procurement solution and allows a completely integrated and customizable solution for managing full Vendor Details including tracking of items such as HR Development, Supplier Rotation and Employment Equity.
 - Document Archiving is integral and provides for secure filing of any document type allowing for safe storage and speedy recovery.
- Integrated HR and Payroll is delivered by South Africa's leading provider, our sister company, Softline VIP. Functions delivered include key features such as employment equity, self-service, online payslips and performance management.
 - Database security and audit trails provide the framework to add additional technologies to assist further with Sarbanes Oxley and other legislative requirements.
 - Enterprise Asset Management is tightly integrated to the FRP system and complies with IFRS regulations.
 - Reports and control panels including key performance indicators to assist in executive board reporting for strategic decisions and risk anticipation.
 - Sophisticated integration engine for seamless real time or batch connections to other operational systems to ensure accurate data transfer.
 - Powerful budgeting, planning, forecasting and consolidation tools give greater insight into the business drivers to ensure growth and cost control management.
 - Improve corporate governance, improve financial and management reporting and improve decision making... and much more!
