

Solutions for Shopfitters and Furniture

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers delivering classic CRM components including sales force automation, customer care, marketing including emarketing and web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Solutions for Shopfitting and Furniture

Shopfitting with a solution that's fitting

High demands for unique solutions that change from shop to shop, a very competitive landscape, and constant changes to materials and material pricing all make the operation and provision of outstanding customer service a management challenge.

Understanding that Shopfitting companies have different needs from most other organizations, our software offers a choice of solutions ranging from powerful ERP functionality, interface-ability to design software, and materials management.

The key features that drive the success of an ERP implementation in this environment include:

• Financial

- o Fully integrated financial modules allow the seamless transfer of data between the operational and financial modules.
- o Full BI capability, giving users easy to understand reports that are delivered on time.
- o Multiple currency and legislation management.
- o Multiple costing methods assigned at stock code, stock category or warehouse levels, with comparative costing.
- o Accounting for wastage and scrap costing.
- o Profitability reporting by product, group, customer or order.
- o Drill down or roll up analysis of costs, expenses or revenues.

• Shopfitting, furniture manufacture, and assembly

- o Interface to design software to upload bills of materials.
- o Upload and store attachments of designs and specifications.
- o Handle multiple variations of same product, by colour, size and finish options.
- o Configure products for make to order or assemble to order environments.
- o Conversions of dimensions, boards to square metres, etc.
- o Handling of consumables, glues and other suppliers.
- o Powerful quality control and inspection management.

• Operational

- o Easy to use web interface that utilises graphically illustrated business process flows, reducing the processing time and burden on employees.
- o Convenient graphical dashboarding allowing users a snapshot of the data in their specific area of responsibility.
- o Multiple language interface, making the system easier to use for both users and support staff.
- o Sub-contract task to outside service providers and manage inventory issued to these sub-contractors like epoxy coating of frames.
- o Combinations of assembled items to create workstations or office suites.
- o Management of imported materials or components.
