

Solutions for Forestry and Timber Operations

Accpac Solutions in Africa

It is impressive to know that after 20 years in Africa, Softline ACCPAC continues to deliver again and again in our ever changing world. A world that unflinchingly demands the highest level of service and latest technology to deliver lasting benefits and reduced cost of ownership. Softline ACCPAC provides this with a scalable set of solutions which allow you to grow, from the modular Sage ERP Accpac suites into our web based all-in-one ERP solution, Sage ERP X3.

Softline ACCPAC's suite of solutions follow your pace of growth, adapting to your unique requirements, deferring to your choice of database and deployment preferences while flexing with your organisational structure. Softline ACCPAC's range of mid-market and enterprise solutions provide full service enterprise management software capable of meeting the most elaborate business processes whilst remaining simple to use.

Softline ACCPAC solutions are powerful toolsets that help you confidently streamline time-consuming financial (GAAP and IFRS) and operational processes using advanced workflow, alerting and business process management technologies. Moreover, the breadth of Softline ACCPAC's solutions extend to supply chain management, warehousing/logistics, service management and mixed mode manufacturing with quality control and document management.

Needless to say Softline ACCPAC provides award winning CRM functionality as an integrated or stand alone offering to all our ERP customers delivering classic CRM components including sales force automation, customer care, marketing including emarketing and web self service portals.

Regardless of your role within your company or your business challenges, Softline ACCPAC has the right solutions for you to improve and extend your reach through collaboration with customers, suppliers and stakeholders to manage the entire lifecycle of a customer from first contact to final contract.

Driving Sustainable ERP for Timber and Forestry

The management of forestry plantations and timber saw mills requires a highly flexible and capable ERP solution. Traceability from plantation through felling to saw mill operations requires a powerful stock management and fixed asset solution able to utilize latest technology bar coding and complex calculations in production management.

By implementing a latest technology Milling solution, you can:

- Manage plantations for growing, planting and felling with compartmental analysis and dimension reporting
 - Transport, processing and storing of timber including traceability through the harvest using RFID tags if required
 - Manage timber stock with complete maintenance of species with statistical groups
 - Manage Logs by size - metres cubed with full co-efficient calculations for conversions of log sizes
 - Use co-efficient calculations and price lists for quotations and orders
 - Bar code logs for stock tracking and for production processes
 - Trace timber for certification
 - Manage purchases and sales with auto-calculations of metres cubed and tonnage as well as dimension management
- Price List calculation and management of logs, bundles with auto-calculation of pricing per log or bundle
 - Compliance with IAS 41 – Agricultural Reporting Standards
 - Compliance with IFRS for asset management, bar coding and plant appreciation
 - Full management of transport as assets or sub-contracted carriers
 - Weight bridge integration
 - End to end management of sawmill production and processes such as treatments and laminations
 - Mixed mode manufacturing is available if back-flushing not preferred
 - Comprehensive business intelligence reporting with real-time alerts
